IDENTIFIERS	*United States (South)

ABSTRACT

This report presents tables of data on the population and enrollment in institutions of higher education in ten selected southern states. The provision of population and enrollment projections is aimed at enhancing desegregation planning processes. The population data were obtained from the United States Bureau of the Census and fall into two categories: historical data and population projections. The historical data, which are broken down by race (all persons, black, white and other) and sex, are presented for the years 1950, 1960, and 1970 and include age cohorts ranging from under five through 85 and over. The population projections cover the years 1975 through 2000. Data are presented for blacks in eight age groups (under 5 through 65 and over) and are broken down by sex. Projected enrollment data are presented by type of institution (four year versus two year), race (black and total), sex, attendance status (full time and part time), and control (public versus private). These data are presented in ten year increments from 1950 through 1970 and in five year increments from 1975 through 2000. (Author/MK)

ACKNOWLEDGEMENTS

Special thanks to Dr. Dudley W. Gill for his assistance in establishing the data base for the Research Program on Problems Relating to the Desegregation of Higher Education and in generating the population and enrollment reports. Special appreciation is also expressed to Ms. Patricia Kilby-Franklin and Dr.Armand Chambers for their assistance in the conduct of the overall study.

MAR 7 1980

PREFACE

The major objective of the Research Program on Problems Relating to the Desegregation of Higher Education was the projection of the population and enrollment of ten southern states by race: Alabama, Florida, Georgia, Maryland, North Carolina, Pennsylvania, South Carolina, Tennessee, Texas and Virginia. Six of these states--Florida, Georgia, Maryland, North Carolina, Pennsylvania and Virginia--were among the original ten states cited by the Adams vs Richardson case as being in violation of Title VI of the Civil Rights Act of 1964; while four of them (Florida, Georgia, North Carolina and Virginia) were among the six states affected by the Adams Order of April 1, 1977. Additionally, two of them (Maryland and Pennsylvania) were engaged in court orders outside of the Order. The remaining four states were representative of southern states which contained a significant number of blacks and black institutions of higher education in general.

It was felt that the provision of projections for these states would enhance objectivity in the desegregation planning processes of those states mandated by the Adams Order to disestablish their dual systems of higher learning. This was particularly true in that none of these states had access to sets of enrollment and population data which were derived from the use of clearly defined methodological approaches, including commonality of demographic defini-

tions and statistical measures. Further, none of these states had established an indicator system designed to detect barriers to equalizing educational opportunity in postsecondary education.

The population data contained herein were obtained from the United States Bureau of the Census and fall into two categories: historical data and population projections. The historical data, which are broken out by race (all persons, black, white and other) and sex, are presented for the years 1950, 1960 and 1970, and include age-cohorts which range from under 5 years to all ages. The population projections cover the years 1975 through 2000 and are broken out by race (all ages and black) and sex according to the following age cohorts: under 5 years, 5 to 14, 15 to 24, 25 to 34, 35 to 44, 45 to 54, 55 to 64 and 65 and over. These projections parallel the Series II set of national projections found in Series P-25 Current Population Reports and assume that the birth rate per woman will approximate 2.1; that the death rates will decline moderately; and that about 400,000 persons will continue to migrate annually.

The projected total enrollment data are broken out by type of institution (4-yr. vs 2-yr.), race (black and total), sex, attendance status (full-time and part-time) and control (public vs private). These data, which were produced according to the "age-specific enrollment rate method" used by the National Center for Education Statistics, are presented in ten-year increments from 1950 to 1970 and five-year increments from 1975 to the year 2000.

For details regarding the methodologies used in producing the population and enrollment pro-

jections, see Projection of the Higher Education Enrollments of Ten Selected States by Race, With Emphasis on Six of the Original Adams States, A Report to the National Institute of Education, Institute for Services to Education, Inc., 1979.
